Testimonials

Sophie You

Head of Sustainability, Scandale éco-lingerie

"ReThink HK 2021 provided a great platform for sustainability players to tell their stories and share best practices that are valuable for all businesses to reflect on. It was such a successful event and I am very much looking forward to attending the next one next year!"

Raatha Ganesh

Disruptor in Chief, Resilio

"I walked into ReThink HK on the morning of day 1 with my curiosity and learner hats on. I walked away at the end of day 2 with amazing insights both reassuring and uncomfortable at the same time. My brain hurts and my heart is full, inspired to drive change in Hong Kong!!

Andres Vejarano

Founder, Cali17

"After the year plus that was, even more reason why ReThink HK's two day conference inspired. Its second outing brought a diverse community of business (large & small), new social enterprises, entrepreneurs, innovators, to share ideas and spark dialogue about resetting the thinking that it's back to business-as-usual, coz it ain't."

Andrea Webster, Managing Director

Chartwell Capital

"The first conference I have been to which spans multiple industries, not just finance, blending content which was relevant to everyone and providing the ability to move across different subjects of interest. Inspirational and an eye-opener on the energy and commitment that's developing across all stakeholders. Look forward to even bigger and better next year. Well done Rethink!"

Pamela Mar, Executive Vice President, Knowledge and Applications

Fung Group

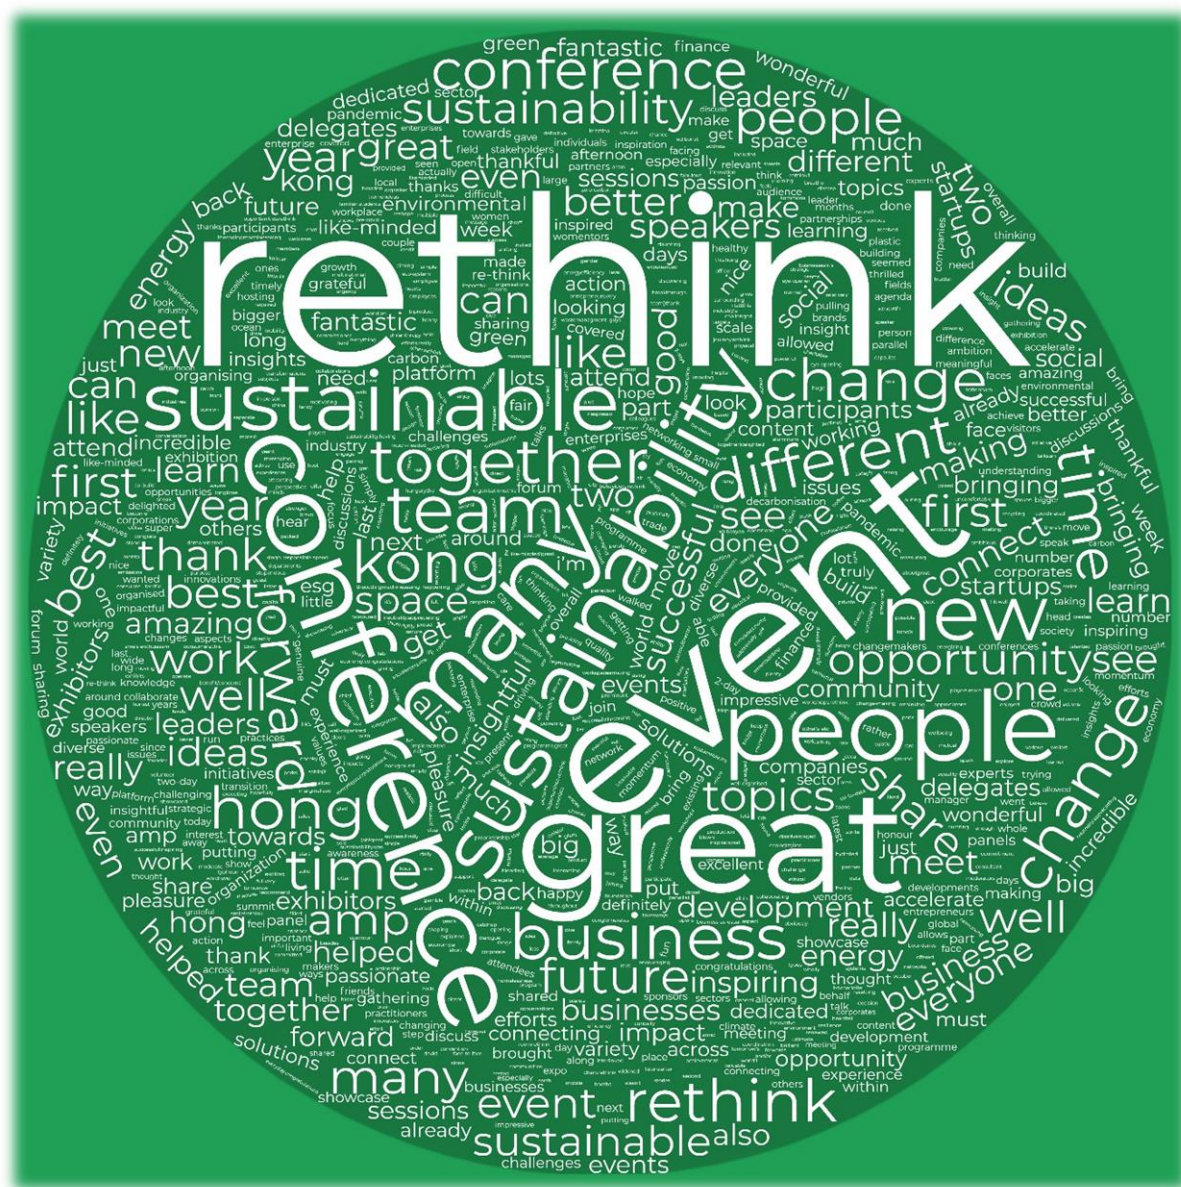

"I thought the trade show aspect was fantastic, among the best I have seen implemented. It was like an art fair but about sustainability. Very nice to walk around, perfectly spaced."

Dr. Mark Watson, Group Head of Sustainability

John Swire & Sons (H.K.) Ltd.

"Delighted to have been part of a panel with colleagues from Jardines and New World Development at the excellent ReThink HK 2021 conference to discuss how ESG is powering HK conglomerates to accelerate sustainable growth and the transition to a low carbon economy."
